

Message for the viewer from Hooman's mother,

Mehri Monfared

1- Please review the updated January, 2017 "Links" to the scientific reports regarding D.N.A and pathology and other legal documents at the beginning of this website, and in support of its written content herein. (Which were discovered and established more than a decade after Hooman's wrongful convection).

2- It's understandable that everybody has an opinion or many different ones to provide, which are welcomed.

However, it is better if an opinion is based on complete knowledge and even better and wiser when it is formed base on scientific facts rather than personal, emotional biases. please always strive to remain educated.

Thank you for your care and God Bless.

3- This website is for those concerned human beings seeking the truth which were obscured, largely distorted or otherwise newer sow the light of the day during Hooman's trial, due to the police and the prosecutors' many cover ups.

4- If you have nothing new or constructive to comment about, you can join many other media outlets that package, and sell their falsehoods and lies wholesale for distribution to whomever they can easily dupe and continue to mislead with their propagandas.

5- Therefore, this website maintains its rights to remove or delete any falsehoods or hate-filled messages perpetrated.

6- Careless and outlandish remarks don't necessarily make them fact just because an unidentified person comments about, let alone amounting to what's legally acceptable as credible or reliable evidence to deserve considerations; which is the sole purpose and function of this website to bring about public awareness to set the record straight and find remedies to injustices incurred by compassionate, high spirited individuals who promote fairness and truth and march for social justice.

May peace, love, long health and freedom be always yours.
